

# AMAN KUMAR | making people more lazy and secure

[dhanyosmiresearcher@gmail.com](mailto:dhanyosmiresearcher@gmail.com) | [X](#) | [LinkedIn](#) | [Github](#) | [Portfolio](#) | +91 6204238614 | IST (GMT +5:30 )

## EXPERIENCE

---

### Digichain ([Bima Labs](#) – [DeFi Protocol](#)) | Smart Contract Developer Aug 2024 – Aug 2025

- Implemented **UUPS upgradable smart contracts** using the Succinct Protocol to enable on-chain verification of off-chain zero-knowledge proofs (ZKPs) [View Code](#)
- LayerZero v2** – configured messaging, DVN and Foundry script for debugging and testing [View Scripts](#)
- Integrated **Chainlink CCIP** to enable lock/unlock mechanism for cross-chain transfers of USBD, and documented a comprehensive README guide [View Guide](#)
- PSM** - implemented core logic, wrote unit and fuzz tests in Foundry, raising **code coverage to >95%** [#PR 130](#)
- Optimized Hardhat deployment scripts and added **automated contract verification** as part of the deployment process, enable **one-command deployment + verification** [#PR 132](#)
- Deployed to 20+ chains, managed troves and **debugged oracle and price-feed** integrations [View Scripts](#)

### One World Nation | Chart Analyst & Moderator Oct 2022 – Aug 2023

- Conducted live crypto chart reading sessions for 5000+ members, leading to a **33% increase in engagement** and **25% faster response** time with improved user satisfaction.

## PROJECTS

---

### Stablecoin | Solidity | Foundry | [Github](#) | [Sepolia Testnet](#)

- Users can deposit WETH and WBTC in exchange for a token that will be pegged to the USD.
- Liquidation function** with bonuses to incentivize liquidation of under-collateralized positions.
- Wrote **30+ Foundry unit tests** covering liquidation & collateral logic

### Smart Contract Raffle | Solidity | Foundry | [Github](#) | [Sepolia Testnet](#)

- Developed a blockchain lottery smart contract that ensured randomness by utilizing **Chainlink VRF** and **Chainlink automation** for seamless smart contract execution.
- Enabled flexible cross-chain deployment and conducted comprehensive testing using mock Chainlink tokens for robust contract performance.

## HACKATHONS

---

### FutureStack Gen AI Hackathon | Solo | [Github](#) | [Live Demo](#) | [Demo Video](#)

- My Invoice NFT - **full-stack NFT invoice DApp** with tested, gas-optimized Solidity contracts
- AI-assisted** frontend integrated with IPFS & polygon chain

### Solana Privacy Hack | Solo | [Github](#) | [Live Demo](#) | [Demo Video](#) | [PPT Video](#)

- WalletSpy** scores wallets, reveals privacy risks, and analyzes on-chain behavior
- Gamified learning guide teaches users to understand and improve wallet privacy

## TECHNICAL SKILLS

---

**Languages** : Solidity, Java, Python, JavaScript, Rust (Basic)

**Tool & Testing** : Foundry, Slither, Hardhat, Unit Testing, Fuzz Testing,

**Others** : EVM, NFTs(ERC-721), ERC-20, DeFi, Chainlink, LayerZero, UUPS, Github, Oracle, EIPs

## EDUCATION

---

- Government Engineering College Khagaria | B.TECH | CSE | 2022-26 | CGPA: 8.74

## ACHIEVEMENT & CERTIFICATION

---

- Won 1st prize in Ideation Challenge organized by department of Industries in college
- Blockchain and Its Application | NPTEL | May 2025 | [Certificate](#)
